## With a straight button you can use the event

@change

(Validations will not be consider)

```
<dynamic-form
  :id="testForm.id"
  :fields="testForm.fields"
  :options="testForm.options"
 achange="valueChange"
<button @click="submitForm"</pre>
  :form="testForm.id" >
 Submit
</button>
```

## Talking about validations
